WORK EXPERIENCE

Eaton

July 2021 – Present

Lead Analyst – Infrastructure Security Engineering | July 2022 – Present

Cleveland, OH

- Support and engineer new security solutions for the enterprise network infrastructure.
- Subject matter expert (SME) for F5 load balancers responsible for external web presence and product applications.
- Manage internal and external Bind DNS servers for all domains owned by Eaton.
- Deploy Checkpoint firewalls for manufacturing sites and operation technology micro segmentation.
- Analyze unsegmented production OT traffic with packet captures and network analysis tools to determine legitimate business traffic.
- Create automation tools using Python and Ansible to streamline mass analysis and deployment of new segmented networks.
- Segment and secure Eaton's public cloud resources and facilitate secure access for users and customers.

Cyber Security Incident Response Analyst (Leadership Development Program) | July 2021 – July 2022

- Respond to alarms reported by security operations center and remediate cyber security incidents.
- Identify vulnerabilities and collaborate with application owners to patch or secure vulnerability applications.
- Research threat actors and report known cyber-attack campaigns to business leaders.

Cisco Meraki

May 2020 – Aug. 2020

Network Support Engineer Intern

San Francisco, CA

- Communicate with customers to troubleshoot and provide support for Meraki's products and solutions.
- Work with Meraki's core products including MX firewalls, MS switches, MR wireless access points, and MV smart cameras.
- Analyze packet captures to determine network traffic flow and identify problematic network behavior.
- Narrow complex network problems and isolate the issue to certain domains or segments of the network.
- Review customer network topologies to make the best proactive recommendations for customers to mitigate network failures, downtime, and security compromises.

Mike's Computer Rescue

Aug. 2019 – July 2021

Lead Technician

Hudson, OH

- Troubleshoot computers and electronics brought into the storefront and perform the necessary repairs to restore desired functionality.
- Translate intricate technical issues into accessible and easily understandable concepts for customers.
- Create automated troubleshooting tools and processes to increase repair throughput.
- Manage business customer with MSP contracts.
- Install structured cabling, networking infrastructure, workstations, and printers on-site.
